NOTICEKIT PRO

Pro includes the Starter files plus repeatable workflows for multiple vendor changes, customer segments, DPA terms, and evidence records.

Files

- multi-change-vendor-register.csv: register for proposed, active, replaced, and removed subprocessors.
- customer-notice-matrix.csv: segment-level notice tracking by owner, method, deadline, and status.
- dpa-clause-intake-worksheet.csv: structured worksheet for customer or segment notice terms.
- attorney-review-packet.md: reusable packet for counsel review.
- procurement-ready-summary.md: concise customer-facing workflow explanation.
- 90-day-operating-calendar.csv: operating calendar for page updates, notices, reminders, and closeout.
- csv-import-export-guide.md: CSV rules for browser-local and spreadsheet workflows.
- evidence-folder-workflow.md: folder structure for preserving proof without NoticeKit hosting.
- 07-closeout-note.md: archive summary for the final proof set after the objection window closes.

Upgrade Use Case

Use Pro when different customer groups have different notice periods, owners, evidence requirements, or escalation paths. The goal is to avoid running a new improvised process for every vendor change.

Disclaimer

NoticeKit provides operational templates, workflow checklists, and local tools for organizing subprocessor change notices. NoticeKit is not a law firm, does not provide legal advice, and does not create an attorney-client relationship. Your contracts, data protection addendum, privacy notices, customer commitments, and applicable laws may require different steps or wording. Have a qualified attorney review your notices, subprocessors, objection process, and customer communications before relying on them.

Fulfillment disclaimer:
