INTERNAL APPROVAL CHECKLIST

Use this checklist before sending a subprocessor change notice. Keep completed copies in the evidence folder for the change.

Change Summary

- Change ID:
- Vendor:
- Change type: add / replace / remove / update
- Purpose:
- Data categories:
- Processing region:
- Customer segment:
- Notice date:
- Planned effective date:
- Objection deadline:
- Internal owner:

Operational Checks

- ☐ Vendor purpose is described in plain language.
- ☐ Data categories are specific enough for customer review.
- ☐ Processing region is known or clearly marked for follow-up.
- ☐ Public subprocessor page entry is drafted.
- ☐ Customer segment is identified.
- ☐ Notice method is known for the affected customer or segment.
- ☐ Recipient list source is recorded.
- ☐ Evidence folder is created.

Review Checks

- ☐ Product owner confirms the vendor is needed.
- ☐ Security owner confirms vendor security review status.
- ☐ Privacy owner confirms data categories and region.
- ☐ Customer success or founder confirms customer segment.
- ☐ Counsel reviews whether notice is required and whether wording is appropriate.

Send Checks

- ☐ Final notice copy is saved.
- ☐ Public page update proof is saved.
- ☐ Notice sender and send date are recorded.
- ☐ Objection deadline is recorded in the tracker.
- ☐ Follow-up reminder is scheduled before the deadline.
- ☐ Closeout owner is assigned.

Open Questions For Counsel

- Does this change trigger notice under the relevant DPA or customer agreement?
- Does the customer have an objection right?
- Is advance notice required before the effective date?
- Does this change require different handling for specific countries, enterprise accounts, or regulated customers?
- Does the final notice need any contract-specific language?

Fulfillment disclaimer:

NoticeKit provides operational templates and workflow materials. It is not a law firm, does not provide legal advice, and does not create an attorney-client relationship. Have qualified counsel review your notices, subprocessors, objection process, and customer communications before relying on them.
